Flatsheets delivery times on request per material quality			

Please note, the Kalzip minimum order quantity for replacement / additional sheets is 50m²

Warranty and Material Appearance

With coil material for sheets supplied in stucco embossed, natural colour or with a pre-weathered surface finish (e.g Alupluspatina, Titanium Silver) and in addition any transparent varnish system, it is possible that from time to time, production-related discolouration and inhomogeneity of the external appearance is visible. These differences in colour, whose intensity cannot be influenced by production techniques, mostly appear at the edges of the coils and are only discernible as optical irregularities in the corrugated, TF and trapezoidal profiled sheets after installation, taking into consideration different directions of viewing as well as light and weather conditions. Colour deviations of this kind do not represent a material defect as defined in the legal warranty regulations, to this extent, warranty claims on the part of the client cannot be accepted.
